

the best things on two wheels

DUNLOP tyres make the best of both wheels. DUNLOP'S endless research into construction, composition and tread design produces the safest, most comfortable tyres on two wheels, with safer cornering, surer steering, more responsive braking and miles longer wear. That's why they are fitted as standard equipment by the majority of British motor cycle manufacturers. And why you, too, should always ask for Dunlop.

DUNLOP

*... all built with
Road-Hug
Rubber for
TOP SAFETY
TOP MILEAGE*

The superb all-purpose tyre with road-hugging rubber for exceptional wet grip, safe cornering, braking and acceleration.

The perfect front-wheel partner for K70, patterned for low rolling resistance and positive steering.

Deep cut pattern for grip plus long life. Suitable for all three wheels of combination outfits.

DUNLOP K70

COMMENT

Much speculation has now flared up in recent weeks upon the question of the three-wheelers. Most seem to be agreed that it is unfair competition. But haven't they decided that a little too late? Of course it all started a long way back with Cyril Hales 998 c.c. Halec (which is still a present day goer) and, later, Mick Wolfe's MPHW special entered through M.P.H.W. Sales. Nobody took these seriously so there wasn't much point in trying to look into the future—at the time!

Now, of course, things have changed. It had to come sooner or later, and Owen Greenwood was the first to realise the possibilities of a machine which was rather a piece of history than a futuristic project. But why leave it so long to say anything about such a machine. Was it again a case of not taking it seriously—until it started winning?

Money! What this word does for most people! Owen Greenwood won the Mallory Sidecar Race of the Year from which he pocketed quite a tidy sum which would have gone to the more conventional chairs should his machine not have been eligible. It would be quite easy to cut out Owen's machine by reducing the capacity limitations, but what of Chris Vincent's B.M.W.? If you can't beat them, join them!

So the stir has started and the F.I.M. have been given the problem to sort out. Major Goode's article may have caused some raised eyebrows because the Secretary General of the F.I.M. so seldom breaks out into print on any subject and it takes a braver man than I to predict a decision by such elegant gentlemen as the International Sporting Commission consists of. Now everyone waits for the answer. Will they or will they not be allowed to compete, for with the advent of a Vincent three-wheeler, the promoters and organisers of world classics must be biting their nails with anticipation. Never before have they been faced with a certain monopoly, other, of course, than from the Germans.

The Editor

But the British scene is a little less easy to predict. The A.C.U. are obviously awaiting a decision from Geneva before they themselves act. Perhaps they don't really mind anyway!

As far as a personal opinion is concerned, I would rather they were restricted to motor racing than to motor cycle racing. Nothing can get around the fact that they are cars rather than motor cycles but are not some conventional sidecars being produced these days with car engines? With an almost total absence of suitable engines, special builders must turn to other sources for engines over 650 c.c. What more natural than a car engine. It is not much of another stride before the 'car' is reached, so where do you draw the line which separates the two?

A DUPLICATED ENTRY**by the Editor**

In this present day and age, the number of road race meetings being organised for the same day is greatly on the increase. As a result, riders or entrants, who haven't the time or inclination to compile and keep a diary, are becoming more and more the offenders of duplicated entries, that is, having two entries for different meetings on the same day.

Quite obviously, this is not only putting organisers to considerable inconvenience but also deprives another rider of a much needed ride. At the same time, it also strictly contravenes the Rules, for which severe penalties exist, and can quite easily entail suspension. Excuses are all very well, but they do not alter the initial fact that, through negligence or mal-intent, one of the organisers will be a place short on the day; a place which could be put to a far better use than wasting it on irresponsible riders.

Rule 141—General Competition Rules

"Any driver who has entered or who has been nominated for a competition and does not drive therein, but drives or has been nominated to drive in another competition or another meeting on the same day shall be dealt with in accordance with the provisions of Chapter IX of these rules.

Any driver who has entered or has been nominated for a competition and does not present himself at the start shall be dealt with in accordance with the provisions of Chapter IX of the Rules unless he can justify his absence, etc. . . ."

From the above, it will be quite clear what is implied. Chapter IX deals solely with penalties which vary from a reprimand to disqualification. It is interesting to note that the act of disqualification prohibits the participation in any motor cycle, automobile, motor-aquatic or aeronautic competition and is the most complete penalty of all and can only be lifted by the F.I.M.

This particular rule is having more attention paid to it these days than, perhaps, many others of a similar nature. It is correct to assume that, although disqualification would not be introduced for a first offence, suspension could easily apply, depending upon the circumstances under issue. "Sorry c——stable, I forgot!" is no defence in law and neither is the fact that you 'mis-understood' the regulations, or 'didn't realise' what you had done, in this particular case. It is the most difficult thing to differentiate between a person who is telling the truth and one who is endeavouring to cover up for deliberately evading the rule.

S.R.3—Standing Regulations

"Within seven days of receipt of the completed entry form, the promoter must notify drivers of the definite position with regard to their entry and whether such entry has been accepted, or is being held in abeyance, or has been refused. Drivers whose entry has been held in abeyance, or offered reserve positions, may enter another event on the same day provided they have notified, in writing, the promoter concerned, of the withdrawal of their original entry. Etc. . . ."

From personal experience the above ruling is the main source of all the trouble; not, that is, the rule itself but more the interpretation of it by those who have taken the trouble even to read it! To me it is quite self explanatory. It beholds every driver who has been held in abeyance or accepted as a reserve, to write to the organiser withdrawing his entry before applying for another meeting on the same day.

The fact that so many people play one organiser against the other is a condition of the times, but not excusable. Those who get caught at it are in for the high-jump. One sees occasionally, variations on the ruling which are quite unfair. Some apply conditions on the rider which are, in themselves, unnecessary. I know of one that gave a rider seven days to make up his mind after receiving a 'held in abeyance' card, if he wanted to enter for another meeting!

The term 'held in abeyance' is one which can be used for most things and gets around the reason for the origination of the ruling, that of advising the driver the exact position of his entry. This ruling is only

basic and any organiser can go to greater lengths to explain to the driver what the position is, unless he wishes to dodge the issue entirely from personal motivations. Members of 'Bemsee' will have doubtless read the full explanations on their advice cards which apply to any meeting the Club runs, from a Closed-to-Club event to a full scale International. Should there be other reasons, a duplicated letter will suffice. However, all this is by the way.

How to avoid the situation is the main theme behind this article as well as to point out the serious nature of such a breach of the regulations. There is no excuse for making the initial mistake of entering for two meetings on the same day. Once having done this, many riders realise their mistake and believe that they can get out of it by being a non-starter at one of the meetings. This is not the case, as a re-reading of regulation 141 will explain.

Get a Diary! Pencil in those meetings you have entered, and ink in those you have been accepted for as and when they come up. BUT, pencil them in before you send them off! This way you will immediately see which other meeting you have entered for on that particular day and so avoid the duplication. There can be only one loser if you don't do something to tidy up your own administration!

K. V. Money, 21 St. James's Road, Radley, Nr. Abingdon, Berks.

THANKS

I should like to express my thanks to all the people who stood in the rain all day on April 2nd so that we, the riders, could have a meeting at all. It is not always possible to give everyone a grin as you ride round, sometimes you may not even feel like grinning, but even so they are really appreciated.

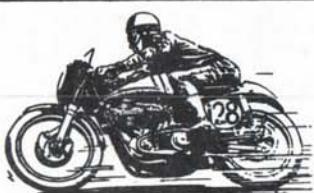

Neston Lewis, Bath, Somerset.
